Impact Report
CAMP OVERVIEW

AMERICAN DIABETES ASSOCIATION® CAMP

More than 18,000 youth are diagnosed with type 1 diabetes every year, a life-changing disease that requires 24/7 management for the rest of their lives. Children with diabetes and their families walk a tightrope to keep blood glucose (blood sugar) levels not too low and not too high. To do this, they must inject insulin multiple times per day or use an insulin pump, monitor blood glucose throughout the day and night, treat severe headaches and nausea, and seek emergency help for life-threatening complications.

The American Diabetes Association® (ADA) created ADA Camp in 1948 to facilitate a traditional summer camp experience in a medically safe environment while creating opportunities for children to forge life-long relationships, overcome feelings of isolation, and gain self-confidence.

CAMP BY THE NUMBERS:

- **2,700+** campers nationwide
- **1,500+** volunteers nationwide
- **$1,600** Approximate cost of overnight camp per child
- **33** camp sessions nationwide
- **$800** Approximate cost of day camp per child
- **$400,000+** need-based financial assistance awarded annually

**100% of Campers**
- Participated in at least four hours of physical activity per day (if able)
- Received mealtime support from dietary staff daily
- Gained hands-on experience in improving their diabetes management skills
- Forged sustainable relationships with peers also learning how to manage the daily struggles of diabetes
- Learned how to manage the daily struggles of diabetes

**100% of Medical Staff**
- Completed pre-camp training in up-to-date diabetes knowledge and treatment
- Received hands-on experience in diabetes management and treatment

**100% of Campers’ Families and Caregivers**
- Experienced a week of respite from the 24/7 management required with a child with diabetes

CAMP OUTCOMES

DIABETES MANAGEMENT SKILLS
After camp, 99% of campers were able to perform at least one diabetes management skill independently:

• Rotate injection sites: 62%
• Draw up insulin without assistance: 57%
• Recognize own low blood glucose levels: 73%
• Understand insulin to carb ratios: 40%
• Gave own injections: 50%
• Check for ketones: 70%

PROBLEM-SOLVING SKILLS
63% of campers were always or often able to solve diabetes management problems after attending camp.

39% of parents and caregivers stated their campers’ confidence to manage their diabetes confidence was “above average” or “very high” by the end of camp.

61% of parents and caregivers stated that their campers’ confidence to interact with their peers was “above average” or “very high” by the end of camp.

30% of parents and caregivers stated that their campers’ confidence to try new methods to manage their diabetes was “above average” or “very high” by the end of camp.

42% of parents and caregivers stated that their campers’ overall self-confidence was “above average” or “very high” by the end of camp.

FAMILY TEAMWORK
36% of parents and caregivers stated that their familial teamwork improved or significantly improved after their child attended camp.

MENTAL HEALTH & WELL-BEING
• Feelings of anger about having diabetes decreased among 13% of campers
• Feelings of loneliness with having diabetes decreased among 11% of campers
• Feelings of sadness about having diabetes decreased among 7% of campers
CAMP TESTIMONIALS

“I can’t think of a better decision we’ve made this year regarding our daughter’s diabetes management than sending her to camp. She came back from camp with more positivity and motivation around managing her diabetes. She says she wants to go to camp forever. We are incredibly, incredibly grateful to Camp Carefree.”
-2023 Camper Parent

“From the second we arrived, everyone was so happy, upbeat, and excited. He had a fantastic time and can’t wait to go back!”
-2023 Camper Parent

“My son had the best time. He loved the staff and the kids in his bunk. Thank you!”
-2023 Camper Parent

“My daughter absolutely loves this camp and it’s the one thing every year she looks forward to. It’s the highlight of her summer to have one week to be with other kids who are like her and understands her life.”
-2023 Camper Parent

“My child now does his pump site changes completely on his own (which he would have NEVER done before camp). He’s much more confident in his diabetes skills.”
-Previous Camper Parent

“My child had the best time of her life at camp. Thanks to everyone who worked hard to give her a camping experience.”
-Previous Camper Parent

The Gift of Camp
Managing camps across the country requires a significant investment. In addition to all the trappings of a traditional summer camp—food, fun, and adventure—our camps provide skilled medical staff 24/7, insulin, test strips, glucose tabs, syringes, monitoring supplies, and more. The support of our partners helps fill the funding gap, provide financial assistance to families in need, and help children build the relationships, skills, and confidence they need to thrive with diabetes. Thank you for your support.
