The Burden of Diabetes in District of Columbia (DC)

Diabetes is an epidemic in the United States. According to the Centers for Disease Control and Prevention (CDC), over 38 million Americans have diabetes and face its devastating consequences. What's true nationwide is also true in District of Columbia (DC). Obesity is linked to up to 53 percent of new cases of type 2 diabetes each year. Treating the chronic disease of obesity can help prevent, delay, and even result in diabetes remission.

District of Columbia (DC) Diabetes Epidemic
- Approximately 42,900 adults in District of Columbia (DC), or 7.8% of the adult population, have diagnosed diabetes.
- Every year, an estimated 3,300 adults in District of Columbia (DC) are diagnosed with diabetes.

District of Columbia (DC) Obesity Epidemic
- Approximately 134,500 adults in District of Columbia (DC), or 24.3% of the adult population, have obesity.

Diabetes is expensive:
Americans with diabetes have medical expenses approximately 2.6 times higher than those who do not have diabetes. And the total estimated cost of diagnosed diabetes in the U.S. in 2022 was $412.9 billion, including $306.6 billion in direct medical costs and $106.3 billion in reduced productivity attributable to diabetes.

In 2017 it was estimated that:
- Total direct medical expenses for diagnosed diabetes in District of Columbia (DC) was $428 million.
- Total indirect costs from lost productivity due to diabetes was $271 million.
- Total cost of diabetes was $699 million.

Obesity is expensive:
Americans with obesity had related medical care costs of an estimated $173 billion in 2019. Having obesity more than doubles an individual's health care costs and out-of-pocket cost for care.

- A person with obesity or overweight with employer-provided health insurance had an average of $12,588 in total yearly health costs, compared to $4,699 for those without overweight or obesity.
- In 2021, a person with obesity with employer-provided health insurance faced an average of $1,487 in out-of-pocket costs, compared to $698 for those without obesity.

To aid the efforts of improving lives, preventing diabetes, and finding a cure:

In 2024, the National Institute of Diabetes and Digestive and Kidney Diseases at the National Institutes of Health invested $2,265,630 in diabetes-related research projects in District of Columbia (DC).

The Division of Diabetes Translation at the CDC provided $6,055,356 in diabetes prevention and educational grants in District of Columbia (DC) in 2022.
