

State of Diabetes

Access and Affordability Survey – 2026

We asked advocates for their insights and perspectives on how the cost of managing diabetes and addressing obesity has impacted their daily lives, as well as the role that health insurance and access to care play in their health journeys. These responses are important in improving and shaping our advocacy programs.

PENNSYLVANIA SURVEY RESULTS

HEALTH STATUS

72%

Households living with both **diabetes** and **excess weight**. Both conditions greatly increase the potential for complications such as heart, liver and kidney disease, and complications.
